

Windsor

Synopsis of Proposed Changes

The town of Windsor is in the beginning stages of updating its 2016 Comprehensive Plan. The updates are reportedly needed largely due to the dramatic population growth of around 25,000 residents to over 40,000 since the adoption of the Comprehensive Plan. The town set out major areas of emphasis for the updates, including but not limited to: diversifying housing and promoting greater affordability; greater emphasis on community design adherence; updates to transportation and land use codes; improved infrastructure and asset management; sustainability and water conservation; and robust community engagement.
